

# Magirus Education Virtualisation Training

[www.magirus-training.co.uk](http://www.magirus-training.co.uk)

## VCP Certification Day

Have you sat a VMware course, and not yet sat, or passed the VCP exam? Are you about to sit a course? Are you struggling to get your hands on ESX time or just sit with your books to revise? Maybe you have thought of VMware questions and have no one to ask, or bounce ideas off.

Come to Magirus and maximise your chances of passing the exam, with our unique VCP Certification day!

### Objectives

At the end of the certification day, you should have revised and updated your knowledge of the functionality in VI3 and be able to answer questions on the following

- Install ESX Server
- Configure ESX Server
- Install Virtual Centre
- Database options and usage
- Configure networking & storage
- VirtualCenter & Licence server
- Control user access
- Deploy and manage VM's
- Allocate and monitor virtual machines' resources
- Ensure high availability of applications

Other topics which are in the certification exam will be covered.

### How?

We will give you access to a VMware Certified Instructor (VCI) in the morning, so come along with questions, and be ready to go through practice questions to get you in the passing mindset. Once we have taken you through practice tests, and answered your questions, we turn the training room into a test room where you can sit the Pearson Vue exam (VCP 310).

\*Our unique guaranteed certification program allows us to work alongside you to maximise your chances of passing. We will provide the resources you need in terms of the revisions days, so you can work towards passing the exam. Whilst we can give you access to the resources needed to pass, we however, can not guarantee your performance in the exam.

### Guaranteed Pass\*

So confident are we in our courses, instructors, and most importantly, our students, we offer all our certification day attendees a Guarantee\* of passing the VCP exam, and so help you on your route to becoming VMware certified!

How? Well come along to a certification day, and included in the price is a Magirus voucher for the Pearson Vue exam which you take with us on the day; Pass and you will be in the 90% of people who do so first time with us. Should you not we will invite you to another certification day. All you need to do is pay for the additional exam. We will invite you back until you pass!

Instructor led revision classes, scheduled certification days, example test questions and our unique guaranteed\* certification success programme are some of the tools we give you to augment our training to help you achieve your certification.

*"I am extremely happy with the professionalism and quality of the instructor and the way that he imparted the knowledge to us. I have been on many such courses from many companies. I feel that this is actually the best course that I have been on so far. I am eager to do the Deploy Secure and Analyze course with the same instructor."*

*Alexey Stokes, VMware*

### Who should attend?

The day is designed for those who aim to become a VMware Certified Professional (VCP) and have attended an authorised course which is a pre-requisite towards the VCP certification.

*"Brilliant, as I have said, this has been the best course I have ever taken. Everything worked as it was supposed to, great classroom conditions. Thank You!!"*

*Russell Nolan, NCE*
